Turning the Civil Register into a reference Database in support of Identification & National ID needs

ID4Africa Conference- Abuja Nigeria
April 24-26, 2018

Civil Registration – General Concept

- **Civil Registration** is the system by which a government records the **Vital Events** (Births, Marriages and Deaths) of its Citizens

- In most countries, there is a **legal requirement** to notify the relevant authority of certain life events

- The result of Civil Registration is a national database called **Integrated / Harmonized National Database**

- The main purpose of Civil Registration is to create **legal documents, required by law,** used to establish and protect the rights of the citizens
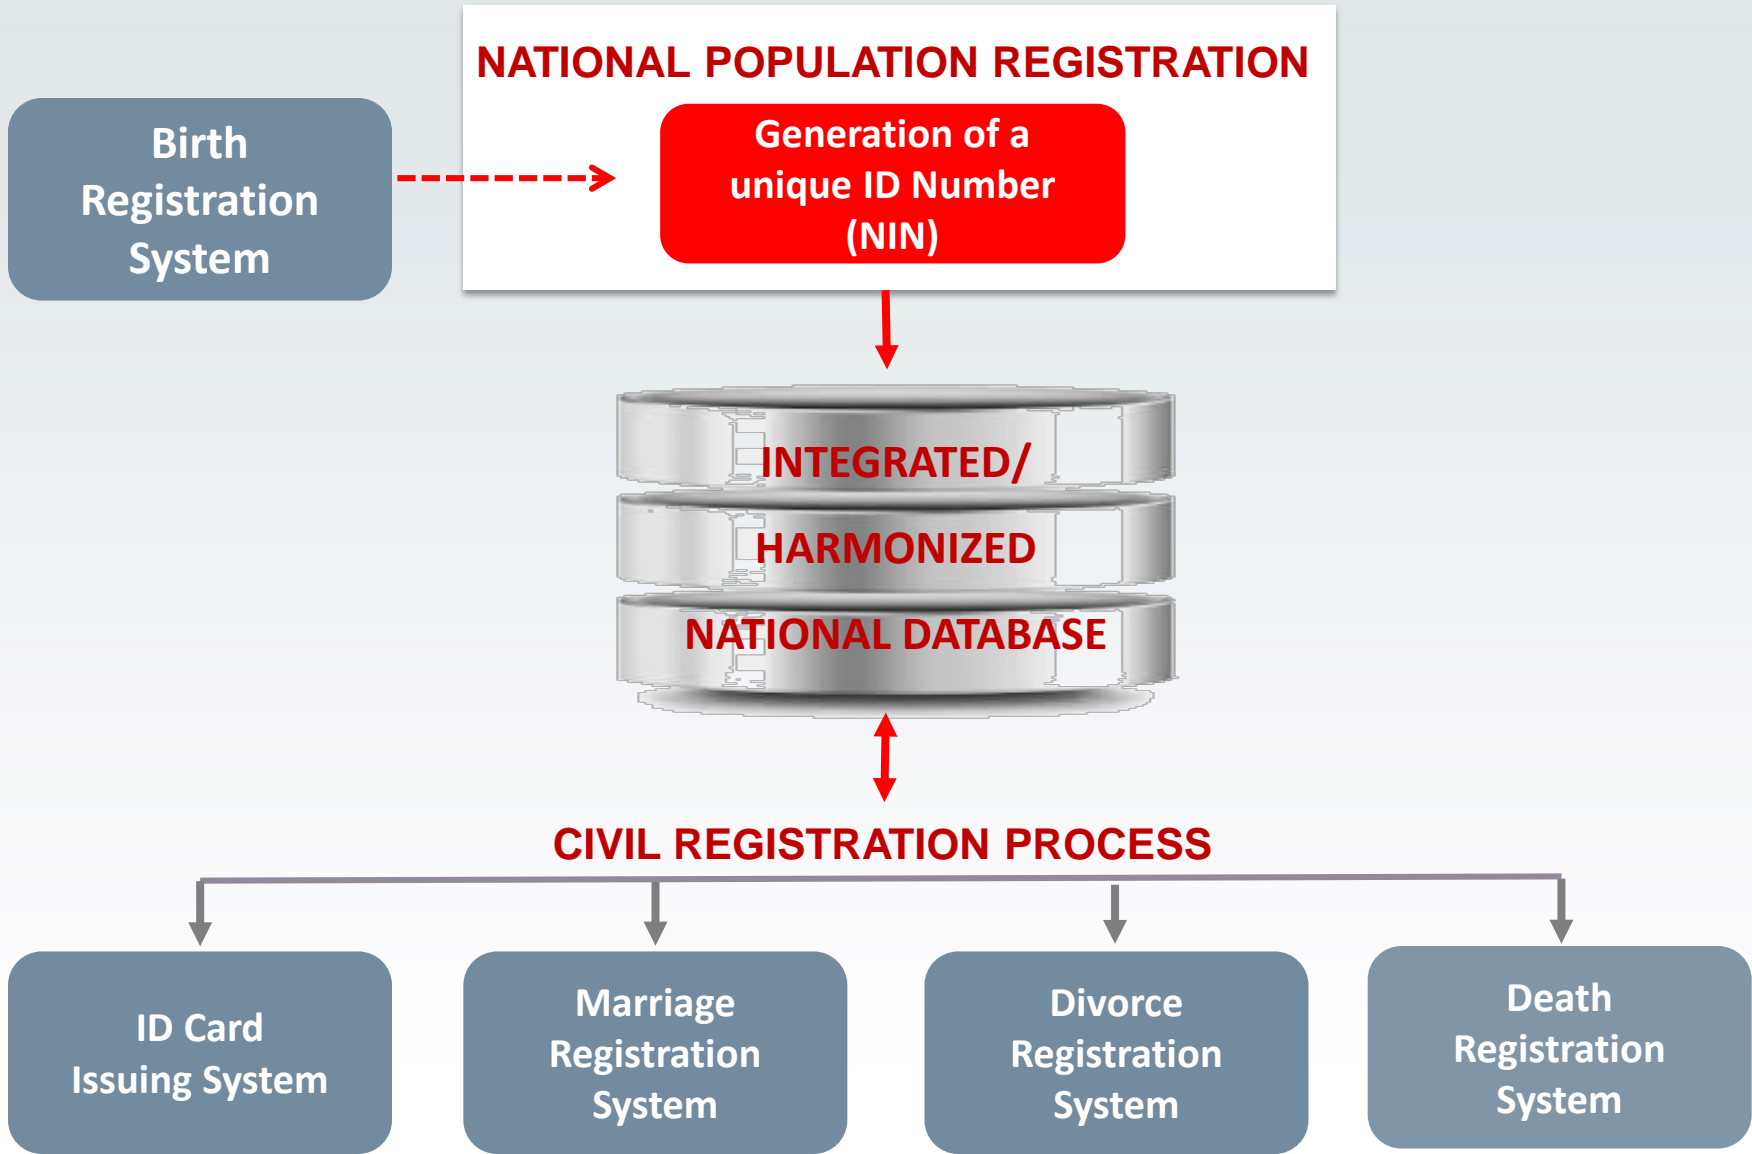

National Identification Number – Unique Reference

➢ The Registration of the country's citizens is performed via the generation of a unique **National Identification Number (NIN)** for each citizen

➢ The NIN is **uniquely and infinitely** assigned to the citizen

➢ The NIN serves as the **Key Reference and asset** for all the Governments' Civil Registry Applications and Documentation

➢ The NIN is integrated into the **secure and reliable National Integrated Harmonized Database**

Civil Registration Process

The importance of Harmonized National Database for countries

➢ The Population Integrated Harmonized Database comprises all the **Vital information of the citizens**

➢ Managing the National Population Database updates all the Government applications connected to it

➢ The Population Integrated Harmonized Database is a **crucial resource for good Governance through Government Planning and Applications, Statistical Reports and Enquiries**
Harmonized National Database – Security and Reliability

➢ **Data Verification**: All captured data is **checked and verified** during Registration

➢ **Data integrity**: The Harmonized National Database is **accurate and reliable**

➢ **Data Protection and Security**: Only authorized users are allowed to update, query or analyse the National Database

➢ **Data Tracking**: The Database keeps track of all events concerning record creation, modification and deletion, including the username and time of the event

Integrated Harmonized Database - For National Secured Documents

Civil Population Registration

Birth & Death Registration

Marriage & Divorce Registration

National ID & e-ID Cards

Passport & e-Passport

Integrated Harmonized National Database

Immigration & Citizenship

Livestock Registration

e- Border Control

Licensing & Registration Solutions

Civil & Criminal AFIS/ABIS

Integrated Harmonized Database – Used for Planning & Social Services

Foreign Trade

Public Education

Social Programs

Pension

Integrated Harmonized National Database

Road construction

Civil Servant HR

Health & Social Security

Banking/ Credit Bureau

NIP Global – Two Case Studies

Case Study #1 – Zimbabwe – (Ongoing project)

➢ **National ID Card System**

➢ **Birth & Death System**

➢ Marriage & Divorce System

➢ e-Passport System

➢ Passport Booklet Production Facility

➢ Livestock Registration System

Case Study #2 – Lesotho –(Ongoing project)

➢ **Population Registration System**

➢ **Birth & Death System**

➢ **National ID Card System, including AFIS**

➢ Marriage & Divorce System

➢ e-Passport System, including AFIS

➢ e-Border Control System

➢ Driving License System

About NIP Global

NIP Global – Advanced IT Expertise and Offerings

➢ **NIP Global is a Custom Software Development House & System Integrator** of end-to-end IT Projects in the Governmental sector, with primary focus on:

- ✓ **Civil Registration Solutions**

- ✓ **Integrated/Harmonized National Database**

- ✓ **Secured Governmental Documents**

- ✓ **Modular Systems**

- ✓ **Advanced Technological Solutions**

➢ NIP has been designing, developing and implementing **Civil Registration Systems** for over 20 years for African Governments and others

we make iT happen
