

# ANGOLA

## Doing the Semba

Eli Basson, EVP and ID Division Manager,  
SuperCom

### Note:

This is draft version for review.

Not to be shared or uploaded to the ID4Africa online archive

Additional non-confidential version will be provided that can be shared online

The most expensive city in the  
world... oh, and they speak  
Portuguese

Angola had solutions for passports, visas and resident cards, but they didn't include today's technologies like biometrics or queue saving services using shared information via the internet.

Shorter queues

# Making change a good thing

It's not only building a nationwide project. It's also about change management. Working as a team with our dedicated Angola colleagues we found ways to involve people, especially staff, and motivate them to embrace the change.

# Diversity can be interesting

**“It’s the little things that are vital.  
Little things make big things happen”.**

**American basketball player John Wooden**

# We gave them Magna

A secured operational platform with a modular and layered architecture based on a core registry that interfaces with services used for many solutions.

# And we gave them biometrics

and also capture their biographic identity.

# We opened a government portal

An easy to access web portal providing anywhere and anytime services in a comprehensive interface with full online support.

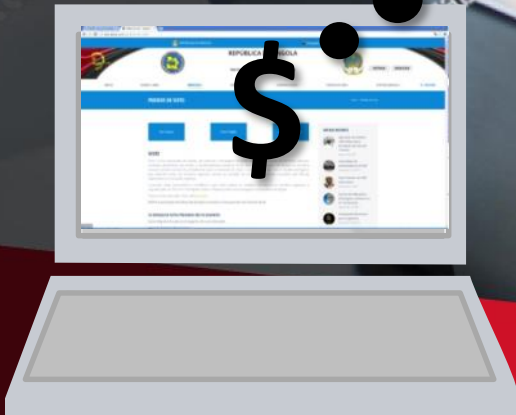

# Self-management using tailored workflows and proven procedures

# We also moved payments to online

Saving time in a cost-effective anywhere and anytime monitored payments service, payments can now be made online via the cyber secure government portal.

# Continually evolving technologically

New lines of communication and new jobs.  
Transferring the knowledge required for  
self-management.

Giving people the legal status they need to live their lives and contribute to society.

# Making people matter

# A more secure Angola

By sharing inter-office information and having access to international Restricted admittance lists, Magna™ intelligence enables the Angola government to control who is entering and leaving their borders.

# One Platform for many needs

Future growth using the same technology and knowledge as the means for expansion into other areas

# New business opportunities

Increased foreign investment, bringing new technologies, jobs and more money from taxation. Angola is also seeing an increase of visitors in their fast-developing tourism arena.
