

# Staying Ahead of Risk

---

ID4AFRICA2019

June 2019

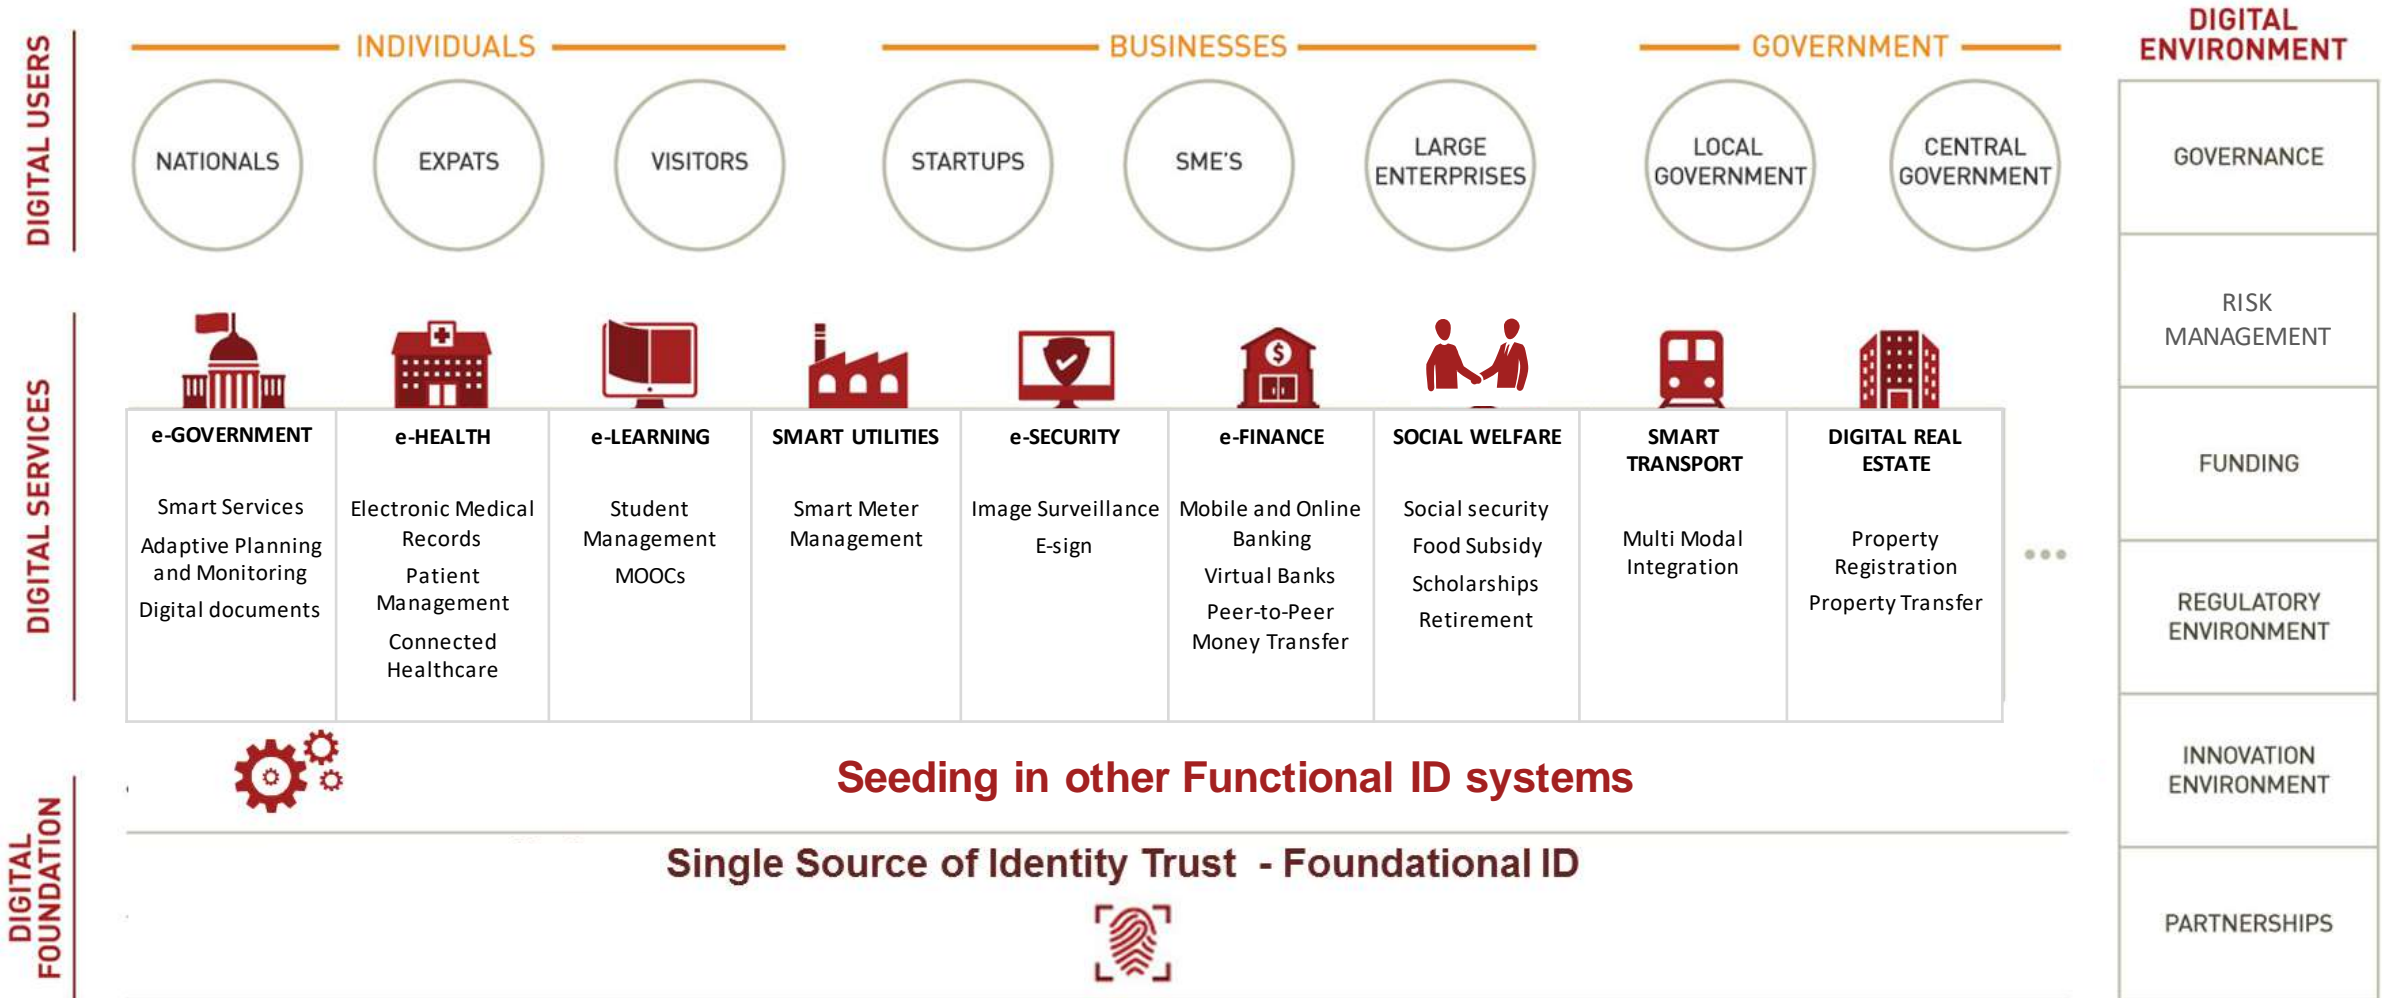

Presented by:  
Rakesh Kaul  
Government & Public Sector Leader  
PwC India

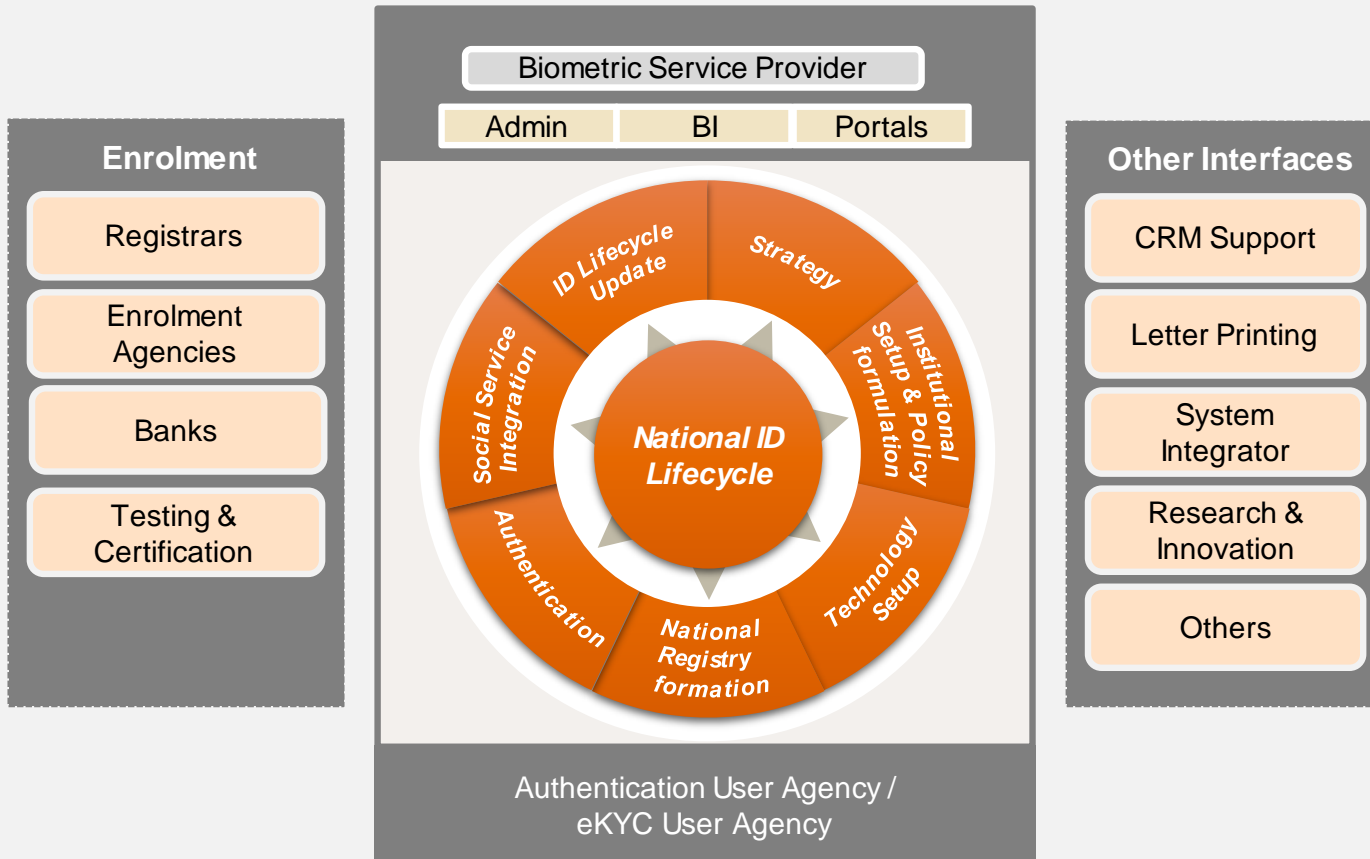

**Technology** is helping solve some of the largest **societal problems** at scale for the people..

# ...and Identity is the foundation for the “Digital Nation” construct ..

***... and this Identity Ecosystem needs to be reliable and resilient..***

### Identity Ecosystem

### Critical challenges in implementation of National IDs

- 1 Gaps in Legal and institutional environment such as absence of personal data protection
- 2 Privacy of Personal Sensitive Information and Security related risks
- 3 Complicated Enrolment process and the cost associated with getting one enrolled in the National ID program
- 4 Scarcity of Infrastructure and associated challenges
- 5 Sustainability of the Program

# To make it reliable and resilient, managing risk becomes paramount..

SC upholds constitutional validity of Aadhaar card, but with caveats

CBSE and UGC can no longer ask for Aadhaar from citizens for the purpose of conducting any entrance examination or running a scheme

Theft of data belonging to millions of South Koreans forces ID system overhaul

AP

SEOUL - After an avalanche of data breaches, South Korea's national identity card system has been raided thoroughly by hackers that the government says it might have to issue new ID numbers to every citizen of 47 million at a possible cost of billions of dollars.

The admission is an embarrassment for a society that prides itself on its high-tech skills and has some of the world's most advanced technology.

ID cards scheme to be scrapped within 100 days

Bill abolishing ID cards and national identity register will be first piece of legislation introduced to parliament by the new government, says Theresa May

Personal Information stolen from National ID Database

# Benefits of GRC Program

## Key risks

- Insiders and ecosystem partner's threats
- Intrinsic vulnerabilities associated with technology such as zero day attacks
- Process vulnerable to fraud
- Changing risk landscape
- Targeted attacks on ID entity
- SLA breaches

## Benefits

### Management of existing and emerging risks

- Early identification of threats for prosecution

### Governance

- Actionable, real time reporting to ID Entity
- Ensure closed looping

### Compliance

- Processes aligned to risks
- Consistent compliance across entire ecosystem

### Risk culture

- Risk ownership and accountability
- Culture of ethics and compliance

### Performance

- Timely prioritized reporting
- Support RCA for breaches
